

Essential Business Analysis

One day, 8-Hour Workshop, Facilitated by a PMP®

If you are responsible for identifying needs and opportunities, gathering requirements, managing scope, or managing stakeholders, then learning essential business analysis skills will improve your business.

This course increases your awareness, understanding, and proficiencies by instilling the knowledge, teaching you the necessary tools, having in-class discussions, and actively participating in lecture activities relevant to your business.

IMMEDIATE TAKE AWAYS

- Understand Levels and Types of Requirements
- Identify Stakeholders and Their Needs
- Use Successful Elicitation and Communication Skills
- Apply Two New Scoping Tools to clearly define scope
- Write Effective Requirements

BENEFITS

- Applicable credits for PMP® and CBAP® certifications
- Less rework, scrap, and testing
- Higher customer satisfaction
- Achievement of project objectives
- Measurable success

WHO SHOULD ATTEND

Project Managers, Business Analysts, Systems Analysts, Quality Analysts, and anyone with the role of internal or external consultant (Information Technology, Human Resources, Finance, Marketing, Operations, Sales, etc.) involved in or managing projects, or interested in understanding root causes of problems and implementing solutions will benefit from this particular course.

Please note that this course satisfies educational requirements toward PMP® and CAPM® certification. These 8 Professional Development Units (PDUs), which equate to hours, are also good for continuing education units for other certifications like P.E.

TESTIMONIALS

- *“Interactive, applicable to job at hand, information can be put in use immediately, plenty of breaks, fast paced!”*
- *“Very good training, I found a number of tools to help me with projects.”*
- *“I will apply the stakeholder/ interview cheat sheet, project scope vs. product scope, how to write specific and detailed requirements.”*
